

Educational resources for preschool (3–6 years old)

ABOUT ZERO WASTE AND CIRCULAR ECONOMY

Young children love to play, and it is the best way to teach them. You can organize simple and entertaining activities to help them learn how to reduce waste, reuse old materials in the classroom, separate waste by putting it in the right bin or clean up the trash after having fun in the kindergarten playground. Kids will develop consciousness about waste issues and become more aware of their impact on the environment when they grow up.

EDUCATE AND ENTERTAIN
